

**Positions Available at Daifuku Wynright**

Assembler	The Assembler uses blueprints and hand tools to build conveyor products.
Brake Press Operator	The Brake Press Operator uses brake presses and miscellaneous equipment to create, shape, and customize materials into a variety of forms dictated by Fabrication plans. Reads and interprets detailed and complex instructions to produce the desired forms.
Horizontal Saw Operator	The Horizontal Saw Operator sets up and operates a metal cutting saw to saw steel into certain lengths as designated according to order requirements to create structural steel products used in industrial automation.
Machine Operator – Roller Shop	The Machine Operator operates the CNC machine to cut and build rollers. Sets up and operates a variety of machines.
Maintenance Technician	The Maintenance Technician performs electrical and mechanical maintenance activities as assigned by the Maintenance Manager.
Material Handler	The Material Handler will perform receiving tasks, including receiving and unloading items, verifying shipment condition, and keeping computer records. The primary goal is to Handle, move, load and unload materials by hand or using a variety of materials handling equipment including tow motors and/or forklifts.
Order Filler	The Order Filler labels and puts away materials received from other departments. Works with other departments to ensure delivery of materials safely and on time.
Order Picker	The Order Picker fills work orders by accurately identifying and pulling materials and delivering them to the requested destination.
Paint Prepper	The Power Coat Loader loads and unloads parts on the Powder Coat paint line.
Powder Coat Painter	The Powder Coat Painter applies powder coat paint to products using a manual spray gun and automated coating system, maintaining required paint thickness and ensuring high quality finishes.
Quality Control Inspector	The Quality Control Inspector supports company quality goals by performing measurements, checks, tests, sampling, final inspection of parts, and other quality control processes in the manufacture of Wynright’s products and services. Duties are about 75% shop time and 25% desk time.
Roller Assembler	The Roller Assembler works with the machine operator to assemble the roller units.
Structural Fabricator	The Fabricator operates fabricating machines to create structural steel products used in industrial automation.
Welder	The Welder joins metal parts using high heat application to form a permanent bond.

Manufacturing Engineer	The Manufacturing Engineer plans, designs, arranges, changes, and optimizes the Wynright Conveyors Shop manufacturing processes.
Product Development Engineer	The Product Development Engineer develops new products for conveyor systems and applications.
Production Manager	The Production Manager will manage the activities and performance of Supervisors to ensure that quality products are manufactured on time, safely, and within budget.
Assembly Supervisor	The Assembly Supervisor supervises activities of the shop employees in the mechanical Assembly department. Supports manufacturing and safety objectives.
Inventory Supervisor	Supervises activities of Shop employees. Supports manufacturing and safety objectives.
Fabrication Supervisor	<b>Manage and supervise 1st shift Fabrication department. Ensure employees adhere to all safety procedures, meet departmental objectives and maintain a positive work environment.</b>
