

PERMIT PROCEDURES FOR COMMERCIAL CONSTRUCTION

Indiana Department of Environmental Management (IDEM) requires all facilities scheduled for renovation or demolition must be inspected by an Indiana-licensed asbestos inspector prior to the start of any renovation or demolition activities for the presence of asbestos. Please call IDEM at 888-574-8150 or refer to their website at <http://www.in.gov/idem/6687.htm> for more information on asbestos compliance requirements.

The **general contractor** must submit the following to the City of Hobart's Building Department for permit review once the site plan has been approved:

- **Application for Zoning Review** – This is not required if business is remodeling same location for which they already have a certificate of occupancy.
- **State of Indiana Construction Design Release** (800-423-0765)
- **One complete set of prints** in PDF format either on CD or e-mailed to permits@cityofhobart.org
- **Three sets of stamped prints** (including mechanicals & site plan)
- **Commercial Construction Application**
- **Copy of fully executed construction contract/work order**
- **Subcontractor List**
- **Letter of Approval/Tap Receipt from Merrillville Conservancy District** (if applicable) (219-980-5220)
- **Letter of Approval from Indiana State Department of Health** (if Septic)

Please allow up to two weeks for plan review by the Building Department. If a **Stormwater Permit** is required, it must be obtained prior to receiving the **Building Permit**. Please contact the HSD Coordinator, at (219) 942-3619, if you have questions regarding the Stormwater Permit.

The general and subcontractors must be licensed within the City of Hobart. If you have any questions regarding licensing/testing procedures, please contact the Building Department at (219) 942-1722. Any type of new commercial construction (including additions) requires a General Commercial Contractors License. The City of Hobart also offers a General Commercial Remodel License for contractors doing interior remodeling only.

Plumbing, HVAC and Electrical permits must be obtained by the Plumbing, HVAC and Electrical contractors. These contractors are also responsible for calling in their own inspections.

In addition to the above mentioned permits, the following may also be required based on scope of work:

- Certificate of Occupancy
- Abatement Fee
- Fire Alarm Permit
- Street Cut Permit
- Sewer Permit
- Sign Permit
- Demo Permit
- Installation or Removal of Underground Storage Tank Permit
- Tap Permit (if Hobart Sanitary District)
- Sprinkler Permit
- Construction Trailer Permit

Building Permit fees for new commercial construction are calculated based on the City's fee schedule. Construction value is determined by the International Code Council's Building Valuation Data table using the construction type and occupancy classification as listed on the State of Indiana Construction Design Release.

If you have any questions, regarding what permits pertain to your project, please contact the Building Department at (219) 942-1722.

COMMERCIAL CONSTRUCTION APPLICATION

Date: _____ Application is for : New Construction/Addition Remodel/Build Out

Property Owner: _____

Name of Business: _____

Job Site Address: _____
